Security

How your information is encrypted

There are certain areas on the site where you may enter and submit additional information. Certain of these areas are encrypted using SSL encrypted transmissions between your Web browser and our Web server. This is designed to reduce the chance that someone (e.g. on your network at work or at your Internet service provider) may try to compromise your private information as it travels from your Web browser to our secure server. You'll know when transmitted data is encrypted by a security notice when you enter an encrypted page, and by the presence of an icon on your browser, either a key for Netscape or a lock for Microsoft Internet Explorer. The pages where you submit your account information, place a bid, and receive

confirmation of a successful bid are all encrypted. In order to keep the highest level of security possible with your credit card information, we do not store your full credit card number.
